

NUTRIENT MIXTURE

CALFUZE™

CALFUZE™, a proprietary blend of water-soluble formulation of essential nutrients fortified with encapsulated silicon.

Product specifications

Physical Specifications

Contents	Specifications
Formulation type	Water soluble Powder
Appearance	Free flowing
pH (1%)	5.00-6.00
Bulk Density (g/ml)	0.6-0.8

Chemical Specifications

Contents	Specification (%)
Total Nitrogen (N)	1.0
Available Phosphate (P ₂ O ₅)	1.0
Soluble Potash (K ₂ O)	0.8
Calcium (Ca)	6.0
Boron (B)	4.0
Zinc (Zn)	3.0
Soluble silicon	0.5

Method of usage

The product is intended for use as agriculture input.

Application Details

Suitable for use in agriculture as foliar applications

Application Dosage

- Foliar sprays: 8-10 oz per acre per application

Key Benefits

- Calcium is sourced from organic source thus assimilates quickly within developing fruits
- Calcium is from nitrate and chloride free source
- Nutrient mixture is suitable for improving the quality of developing fruits
- Improves marketable yield
- Improves quality and shelf life of produce

Method of usage

AK, AZ, CA, FL, ID, OH, MI, MS, NJ, NY, TX
