

AGROBOOST Zn

AGROBOOST Zn is the formulated suspension concentrate having zinc in the highest concentration sourced from chloride and nitrate free source. The formulation aimed to fulfil zinc requirement to crop. Zinc present in the formulation is easily absorbable and assimilable form by plants due to its small particle size.

Product specifications

Physical Specifications

Contents	Specifications
Formulation type	Suspension Concentrate
Appearance	Milky slurry
pH (5%)	8.0-10.0
Density	1.65-1.80

Chemical Specifications

Contents	Specification (%)
Zinc (as Zn)	39.5

Derived from: Zinc oxide

Application Details

Suitable for use in agriculture as foliar applications.

Application Dosage

- Foliar sprays: 10-15 fl oz per acre per application. Apply 1-2 times during early vegetative stage.
- Additional applications can be taken as per requirements.

Key Benefits

- Fully water soluble formulation with high zinc content.
- Plays a key role during vegetative growth in all crops
- Zinc is sourced from nitrate, chloride and sulphate free source
- Plays a key role during growth and development of crops
- Regulates various physiological and catalytic processes
