

AGROBOOST Potassium

AGROBOOST Potassium is a proprietary blend of liquid potassium fertilizer derived from chloride free source fortified with other bioactive molecules and nutrients having a role in stimulating plant growth and development.

Product specifications

Physical Specifications

Contents	Specifications
Formulation type	Water soluble liquid
Appearance	Viscous liquid
pH (10%)	11.00-13.00
Solubility (5%. Min)	Clear Solution
Density	1.40-1.60

Chemical Specifications

Contents	Specification (%)
Soluble Potash (K ₂ O)	30.0

Derived from: Potassium carbonate, Potassium acetate

Application Details

- Suitable for use in agriculture as foliar applications or fertigation.

Application Dosage

- Foliar sprays: 1.0-2.0 gallons per acre per application.
- Soil drenching: 2.0-5.0 gallons per acre per application.

Key Benefits

- Source of plant essential nutrients.
- Suitable for application on wide range of crops due to low salt index.
- Easy absorption by leaves.
- Optimizes potassium nutrition for crops.
- Triggers plant physiological and metabolic activities at plant cellular level for enhanced impact.
- Strengthens crops against abiotic and biotic stresses.
